

Hanksville, August 7th 1929

To the State Engineer's Office

State Capitol

Salt Lake City, Ut., and

To Whom It May Concern:

This is to certify, that J. S. E. Johnson of Hanksville, Wayne County, Utah, at the request of Pace ~~and Hall~~, parties interested in regards to the flow of water of Bowl Creek, herein submit to your Office my unbiased findings:

On July 1st 1929, I did go up Bowl Creek to the Fairview Ranch diversion and measured said stream, and found a discharge of 5 inches high over a crest of 5 feet. I diverted two thirds of the entire stream or 5 ft. x 3" down the main channel of Bowl Creek to Hall's farm.

On July 4th last, I went up the Bowl creek channel and found the stream had run itself out two miles above Hall's farm, I went on up said Bowl creek to the diversion of said water and found that the Pace ditch had little more than enough water at the ranch for stock and culinary purposes, then being fully satisfied that 5½ second feet of water will not reach Hall's farm during the hot summer season, I turned all the flow of water at said point of diversion down the Pace ditch.

Althou knowing that there was more snow in the Mountain last winter than the year before, I will state herein, that at least 7 or 8^{second} ft. of water would be needed to reach Hall's farm.

And further, I will say herein, that on and after July 20th
the flow of water in said Bowl creek decreases fast and barely
enough water reaches Pace ranch during the ^{late} summer season to
water stock and for culinary purposes unless increased by freshets.
And finally I will said that this foregoing statement is true
and correct according to my candid opinion and judgement.

In Witness whereof I have this 7th day of August 1929
set my hand and seal.

In the Presence of

F. J. Weber

S. E. Johnson
